Color Key for Charts

Type of Chart	Scale	Purpose
HARBOR CHARTS (outlined in red)	1:50,000 and larger	For navigation and anchorage in harbors and small waterways.
COAST CHARTS (outlined in purple)	1:50,001 to 1:150,000	For coastal navigation inside the offshore reefs and shoals, entering bays and harbors of considerable size, and navigating certain inland waterways.
GENERAL CHARTS (outlined in purple)	1:150,001 to 1:600,000	For use when a vessel's course is well offshore but when its position can be fixed by landmarks, lights, buoys, and characteristic soundings.
SAILING CHARTS (outlined in purple)	1:600,001 and smaller	Plotting charts used for offshore sailing between distant coastal ports and for approaching the coast from the open ocean.
SMALL-CRAFT CHARTS (outlined in green)	1:80,000 and larger	Specially designed with small craft information.

The scale of a chart is the ratio of a given distance on the chart to the actual distance that it represents on the earth. *Example: One unit of measurement on a 1:10,000 scale chart is equal to 10,000 of the same unit on the earth's surface.* **Large-scale charts** show greater detail of a relatively small area. **Small-scale charts** show less detail, but cover a larger area. Certain hydrographic information may be omitted on smaller-scale charts. Mariners should always obtain the largest-scale coverage for near shore navigation.

Puerto Rico and Virgin Islands

Chart Number	Title	Scale

Color Key for Charts

Type of Chart	Scale	Purpose
HARBOR CHARTS (outlined in red)	1:50,000 and larger	For navigation and anchorage in harbors and small waterways.
COAST CHARTS (outlined in purple)	1:50,001 to 1:150,000	For coastal navigation inside the offshore reefs and shoals, entering bays and harbors of considerable size, and navigating certain inland waterways.
GENERAL CHARTS (outlined in purple)	1:150,001 to 1:600,000	For use when a vessel's course is well offshore but when its position can be fixed by landmarks, lights, buoys, and characteristic soundings.
SAILING CHARTS (outlined in purple)	1:600,001 and smaller	Plotting charts used for offshore sailing between distant coastal ports and for approaching the coast from the open ocean.
SMALL-CRAFT CHARTS (outlined in green)	1:80,000 and larger	Specially designed with small craft information.

The scale of a chart is the ratio of a given distance on the chart to the actual distance that it represents on the earth. *Example: One unit of measurement on a 1:10,000 scale chart is equal to 10,000 of the same unit on the earth's surface.* **Large-scale charts** show greater detail of a relatively small area. **Small-scale charts** show less detail, but cover a larger area. Certain hydrographic information may be om
